

## Our Energy Policy

We oblige ourselves to continuously improve our energy-related performance by our Energy Management System.

### Energy Efficiency

We pay attention to designing and also operating our lines and processes in an **energy-efficient** way.

### Energy Savings

We reduce **specific energy consumption** of our lines, hereby saving on energy costs.

### Renewable Energies

We prioritize **renewable energy sources** and raise their shares on our energy consumption.

### Emissions Reduction

We reduce **greenhouse gases** of our lines and processes for environmental protection.

### Security of Supply

We enhance share of **self-generated energy**, in order to increase our independence from the energy market.

### Integrity & Mindfulness

We integrate energy policy into our processes and look out for **reduction potentials** in our work routine.

Our Energy Policy is substantiated annually by measurable **objectives**, whose achievements are continuously monitored by **key figures**.
